

Behavioral Interviewing Questions

METRICS:

Uses and creates analytical tools to document, assess, and measure information to support business decisions.

1. Describe the metrics to which you are held accountable. Why were these metrics chosen?
2. How do you analyze and use information and data to support business decisions?
3. How have you redirected metrics to achieve business results?
4. If the metrics are trending in the wrong direction, what tools do you use to assess and analyze the situation?
