

Behavioral Interviewing Questions

PROBLEM-SOLVING:

Gathers and analyzes information, identifies goals, explores and selects solutions, implements an action plan, and evaluates results.

1. What is your approach to problem-solving? Give an example.
2. Give an example of when you saw a problem and took action ahead of the curve?
3. How has your approach to problem-solving changed as you've progressed in your career?
4. Tell me about a problem that needed fixing but you weren't sure how to approach it.
5. Describe a time when you developed a process in an effort to solve a problem.
6. Have you ever had to fix a problem twice? Describe the situation.
